A MESSAGE FROM OUR EXECUTIVE DIRECTOR

In 2018, the Chemical Educational Foundation® (CEF) continued to prepare tomorrow's STEM workforce, working to inspire students, engage educators, and strengthen communities to build a better world through the science of chemistry. CEF was on the frontlines all year long — training teachers and volunteers; connecting industry employees with K-8 classes; and bringing the excitement of chemistry to students through our You Be The Chemist programs.

Inspiring students to explore chemistry and careers in science early on is key to closing the STEM jobs gap. This year, CEF continued to connect businesses and employees with local schools, creating direct, sustained relationships with students — showing students that a career in STEM is not only possible, but a real opportunity in their own community.

Thank you to all of our community volunteers, educators, and supporters — your hard work and commitment help us bring chemistry to life in classrooms across the country. I look forward to continuing this important work in the new year.

Dwayne Sattler
Executive Director

OUR STRATEGIES AND IMPACT

1,800 educators served

Inspiring students early in life to pursue science and chemistry in study and careers.

CEF IMPACT

You Be The Chemist

More than 50 hands-on science activities that use common, inexpensive items to bring more interactive science instruction to classrooms and raise educator confidence in teaching science.

600,000 K-8 students engaged through Activity Guides

CEF IMPACT

Activity Guides were released in their fifth editions for free, with more accessible content for students and teachers that aligns with science education standards.

48,000 students participated from 592 schools in 42 U.S. states and territories

CEF IMPACT

Student participants report increased awareness of chemistry's role in everyday life, increased interest in STEM careers, and a boost in confidence in their ability to understand chemistry.

CEF IMPACT

Engaging educators to build their confidence in teaching hands-on science.

CEF IMPACT

Professional development workshops that build educator confidence in teaching science.

National Challenge

Celebrates and elevates the science of chemistry to inspiring students through local, state, and national competitions.
To support CEF and the You Be The Chemist programs, visit www.chemed.org
