YOU BE THE CHEMIST®

ACTIVITY GUIDES

You Be The Chemist®

Our popular *You Be The Chemist* programs are geared towards K–8 educators and learners. CEF strives to inspire our future leaders to pursue science-related careers and to improve the overall understanding and appreciation of chemistry and chemicals.

"My students love the activities because they are very engaging. They help students get excited about science!"

– Carmen Clayborn, IN Middle School Teacher

What are *You Be The Chemist* Activity Guides?

You Be The Chemist Activity Guides are award-winning, free science activities that offer fun and inexpensive ways for educators to bring hands-on science to K-8 students.

They are the perfect way to introduce important chemistry and science concepts through accessible hands-on activities and real-world connections using common household materials.

The Activity Guides feature:

- Over 50 activities featuring science activities that use common, inexpensive household materials
- Background information and explanations of lesson plans to help educators bring science to life in the classroom
- Corresponding activity sheets, answer keys, vocabulary, and lesson extensions and modifications
- Examples of how science and chemistry concepts connect to the real world
- Connections to the *You Be The Chemist* Challenge®!
